Tony Adams

Paperback: \$150.00
Discount Price: \$120.00
ISBN: 978-1-4129-9921-2
Expected August 2012,
456 pages

"The global expansion of higher education capacity and quality offers both challenge and opportunity for higher education. This timely book should prompt the kind of strategic and comprehensive thinking needed to expand internationalization of higher education institutions and widen global opportunities for students and other higher education customers." – M. Peter McPherson, *President, Association of Public and Land-Grant Universities, United States*

"Bridging theory and practice, this SAGE Handbook focuses on the key questions educators must address in international education. The reader will benefit from the broad coverage, bold predictions, and strategic insights presented in this encyclopedic survey of the internationalization of higher education." - Jo Ann Gora, *President, Ball State University, United States*

"This essential handbook brings together experts from around the world in addressing the key issues of international higher education in the beginning of the 21st century. A very relevant publication indeed."
-Bernd Wächter, *Director, Academic Cooperation Association, Belgium*

"The editors are to be congratulated for putting together such an impressive collection of chapters that help define the field... If there were a "Who's Who in International Education," the editors and contributors would be prominently featured in it because they are serious scholars with distinguished professional records. This handbook goes a long way to explain and interpret this growing field not only to (those outside the field), but perhaps – unexpectedly – to international education professionals themselves.... It is especially good to see the handbook reflecting a variety of cultural and national perspectives by including prominent educators and scholars from a variety of countries. (This handbook is an)... extraordinary venture that will raise the bar of competencies and knowledge of the field." - Josef Mestenhauser, *Distinguished International Professor Emeritus, University of Minnesota, United States*

This groundbreaking handbook serves as a guide to internationalization of higher education and offers new strategies for its further development and expansion in the years to come. With a decidedly global approach, this volume brings together leading experts from around the world to illustrate the increasing importance of internationalization. International Education as we have known it has evolved from a fragmented approach on study abroad and international students into a strategic and comprehensive internationalization concept that affects all aspects of higher education. The text encompasses the diversity and breadth of internationalization of higher education in all its thematic facets and regional impacts.

The handbook comprises five sections and twenty five chapters. The first section includes chapters placing internationalization of higher education in a conceptual and historic context. The second section presents chapters with different thematic approaches to internationalization, including leadership, institutional strategies, and risk management. The third section contains chapters addressing the internationalization of the curriculum, teaching and learning process and intercultural competencies, along with the synergy of local and global contexts. The fourth section focuses on the abroad dimension of internationalization and comprises chapters on the mobility of students, scholars, institutions, programs and projects. The concluding section maps regional trends in international education and provides insightful directions of the future of internationalization in the 21st century. Throughout, chapters provide practical examples and case studies in an effort to bring theory and practice together.

This publication will be of interest to everyone involved in higher education as a senior administrator, a teacher or scholar, especially those in international higher education worldwide.
